

①

Dear Students

It is most odd time of our life.
We can do nothing except distancing.

But at this moment study is as essential as food. So, do start serious study with regular efforts. Subject wise and topic wise notes are being uploaded regularly do study them. First write them, then revise and solve the problems; in all the subjects.

In chemistry several units are uploaded so far, you first write, read and revise redox reactions, its concept is needed in electrochemistry.

Do seriously study basics of organic chemistry, reaction mechanism, isomerism etc and practice them. Do study hydrocarbons also. These parts are back bone for organic chemistry in class - XII.

Have a brief study of group-13 and 14 and then detailed study of group 15 to 18, followed by d and f-block elements.

In same unit notes of two or more teachers may be uploaded; you have select any one as per your choice.

Notes of polymers, chemistry in everyday life, surface chemistry are also uploaded.

You have to study them with proper efforts, so that after having regular classes, in less time units can be completed.

Please give proportionate time for all

Subjects.

(2)

The present problem is not of a particular collage or district or state or Country, rather it is global.

So, we can not escape from facing the problems. only social and physical distancing and strength of body can protect us. So, try to boost immune system by using several measures.

At present updates in Mathematics is slow but it will accelerated soon. If you do not have books with you; please write on whatsapp and send on 7870406687 so that required part will be uploaded soon, as syllabus of Class -XII has been uploaded on request of a student like you.

lastly I would like to say stay home, stay safe. use lukewarm water and other protective measures to boost your immune system and study as much as you can.

wishing good health, healthy life for you and your family.

yours
